

JAVA PROJECT REPORT INFORMATION AND COMMUNICATION TECHNOLOGY SERVICES

ABSTRACT:

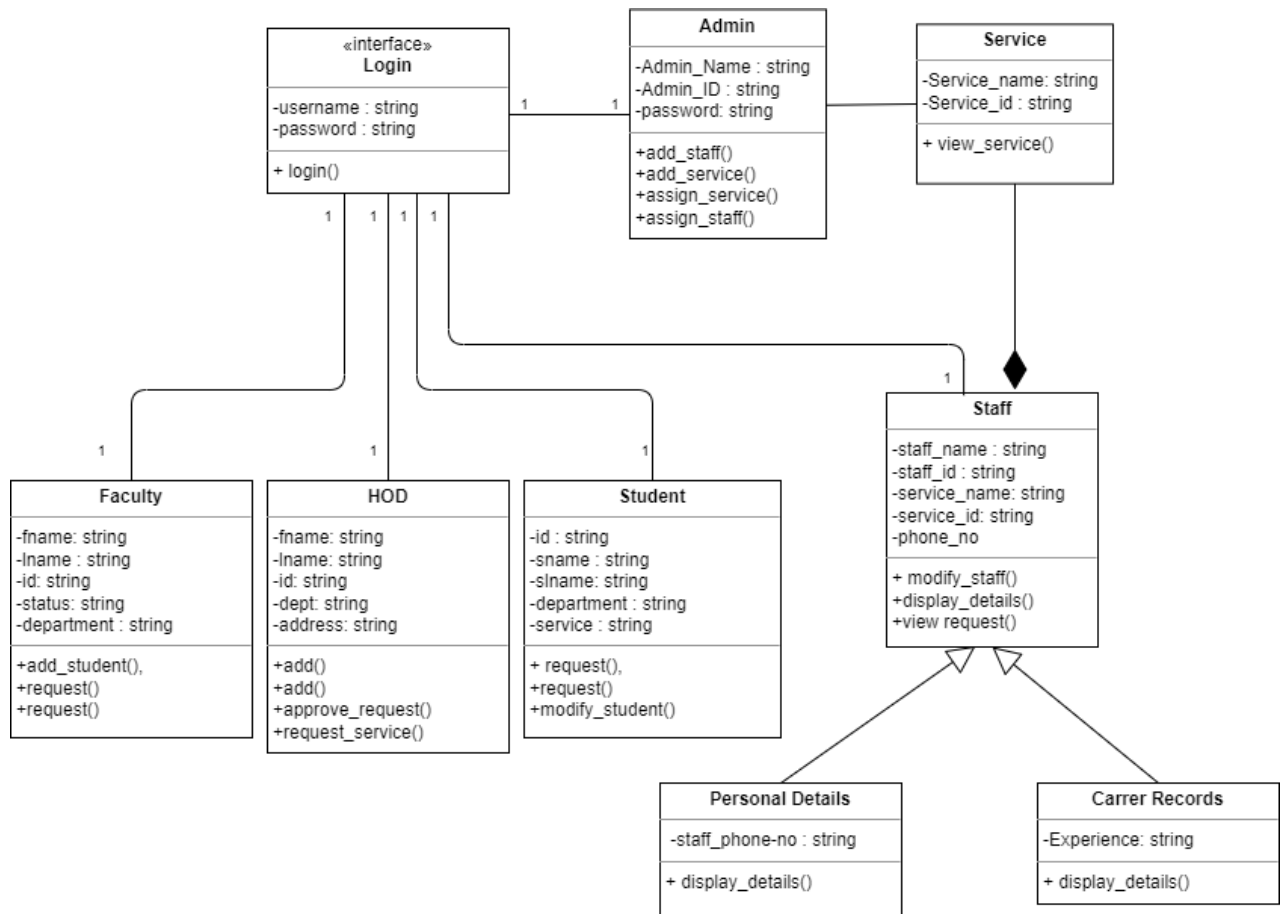

Our project aims to develop a system to allocate the various ICT services like software, type of hardware, network, multimedia, etc. to the college. Various clients like students, higher authorities, faculty can request service to the ICT service department. The ICT department has an admin and various staff to provide the services for the client. According to the client's request, experts of the requested service would be provided by the ICTS department to resolve the issue. The various services provided by the department are installation of software, repair computer parts like keyboard repair, CPU parts repair etc., improve network connectivity, multimedia services etc. Some of the constraints kept by the ICTS department are clients like students and faculty can place a request for the services only after a special approval from the higher authority(HoD) of their respective department. But the clients with a higher job position like the head of the department, principal, department coordinators, etc. of the college do not require any approval to request the services provided.

USE CASE DIAGRAM:

CLASS DIAGRAM:

FEATURES IMPLEMENTED:

Abstraction:

- Implemented a login interface
 - different users(admin,staff,hod,faculty and student) can login with their login credentials

Inheritance:

- Implemented a hierarchical inheritance
 - staff class is inherited by two classes: personal details and career records.

Polymorphism:

- Implemented function overloading
 - request functions of faculty and staff for requesting service and requesting service is overloaded
 - add function of HOD for adding students and faculty is also overloaded.
- Implemented function overriding
 - display_details function of staff is overridden.

Encapsulation:

- Used packages,classes and objects to implement the code

User Defined Exception:

- Created a custom exception for checking whether the constraint for password is matched or not.

Final keyword:

- The password for admin login is fixed, the password entered by admin would be checked with the password set as final.

Java Swing:

- Implemented all graphical user interface design part using java swing concepts

Java JDBC

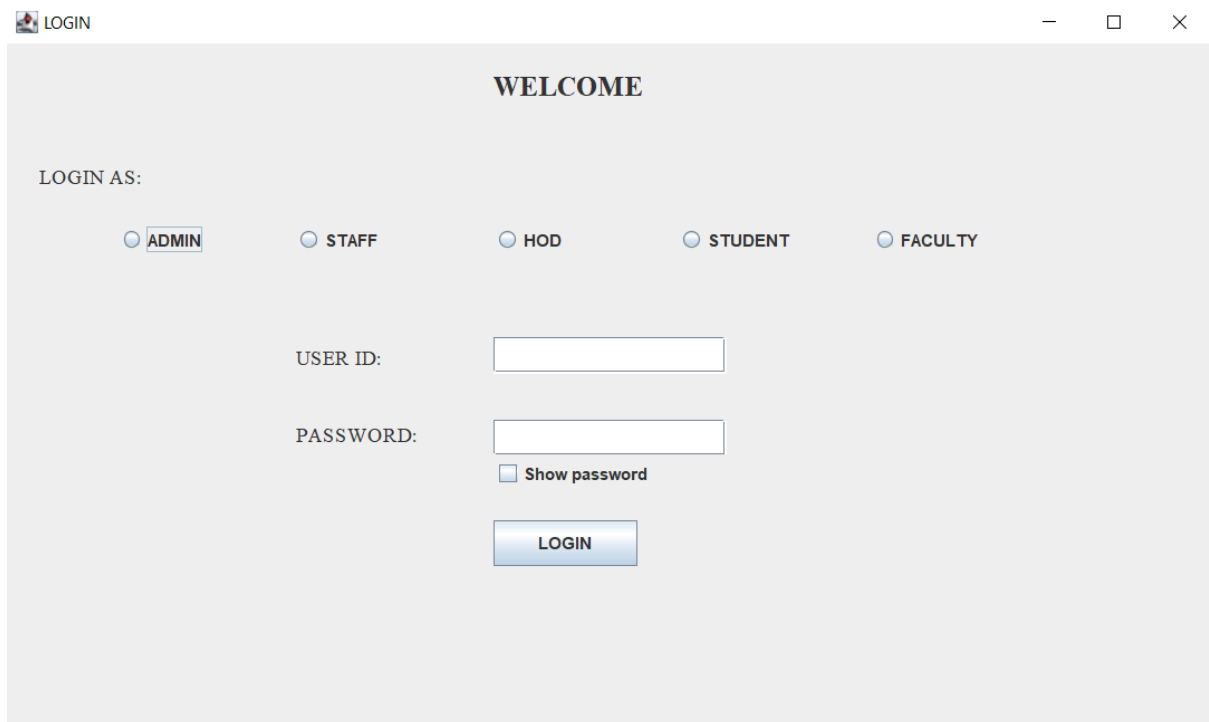

- All sql connections are made and successfully implemented the storage of data.

Composition

- A composite relation is established between staff and service.

GRAPHICAL USER INTERFACE

VIEW

BACK

Admin can allot staff for specific requests and view status.

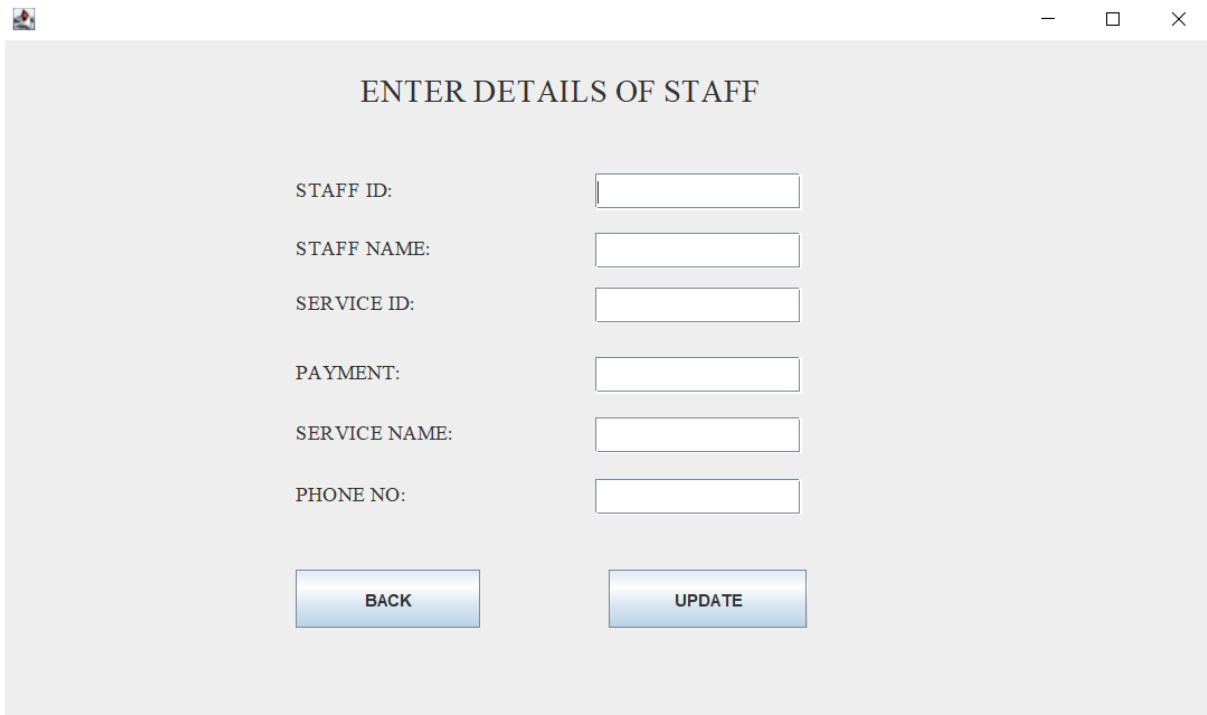

Staff and functions

A screenshot of a software window titled "WELCOME STAFF". The window has a standard title bar with a small icon on the left and minimize, maximize, and close buttons on the right. The main content area is light gray and contains a vertical stack of seven blue buttons with white text. The buttons are labeled: "MODIFY DETAILS", "VIEW REQUEST", "VIEW DETAILS", "VIEW CAREER", "PESORNAL DETAILS", "VIEW SERVICE", and "BACK".

The functionalities of staff are to modify their details, view the requests received, view their personal, official and career details..

Modify Staff

A screenshot of a software window titled "ENTER DETAILS OF STAFF". The window has a standard title bar with a small icon on the left and minimize, maximize, and close buttons on the right. The main content area is light gray and contains a form for entering staff details. The form consists of six labels on the left and corresponding text input fields on the right: "STAFF ID:", "STAFF NAME:", "SERVICE ID:", "PAYMENT:", "SERVICE NAME:", and "PHONE NO:". Below the input fields are two blue buttons with white text: "BACK" and "UPDATE".

Staff can edit, modify their details and the new details will be saved in the database.

APPROVE REQUEST

BACK

These functionalities of HOD are to add students ,add service , request service and approve requests .

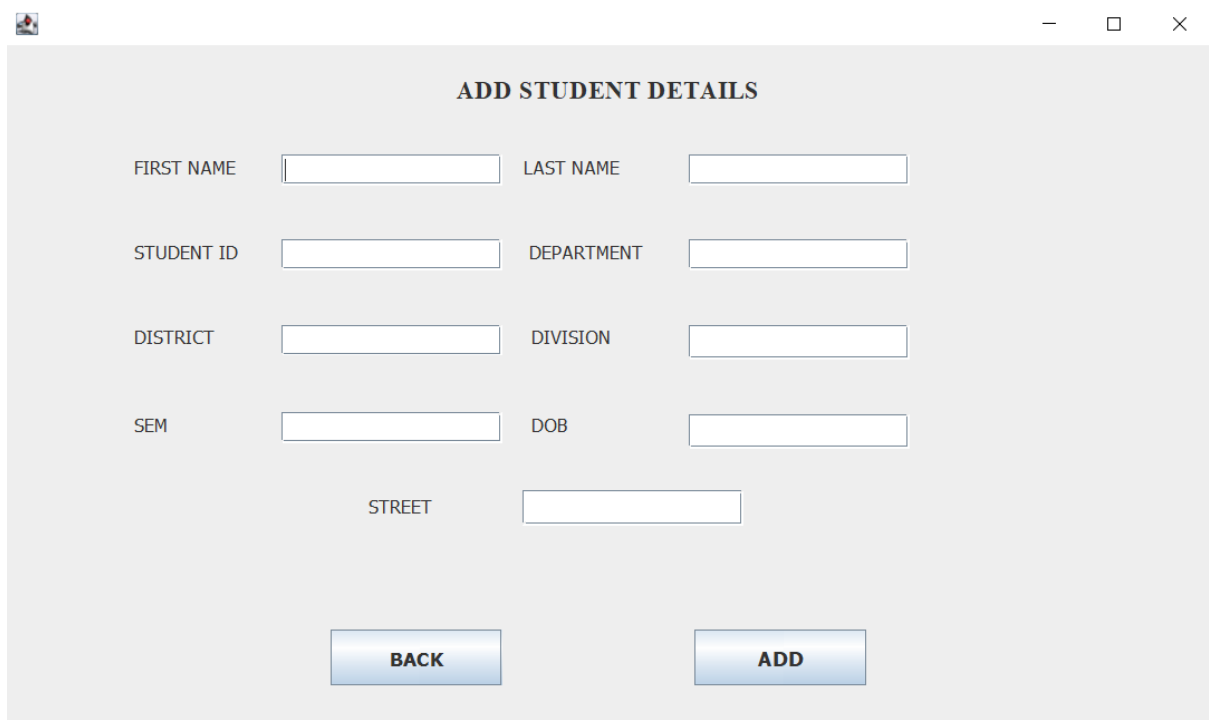

Request service

A screenshot of a web application window titled "Request service". The window has a standard OS-style title bar with a minimize button, a maximize button, and a close button. The main content area has a light gray background and is titled "REQUEST SERVICE" in bold, uppercase letters. Below the title, there are six text input fields arranged vertically, each with a label to its left: "FIRST NAME", "LAST NAME", "ID", "SERVICE", "DEPARTMENT", and "STATUS". At the bottom of the form, there are two blue buttons with white text: "BACK" on the left and "ADD" on the right.

HOD can request for service and the details will be stored in the database.

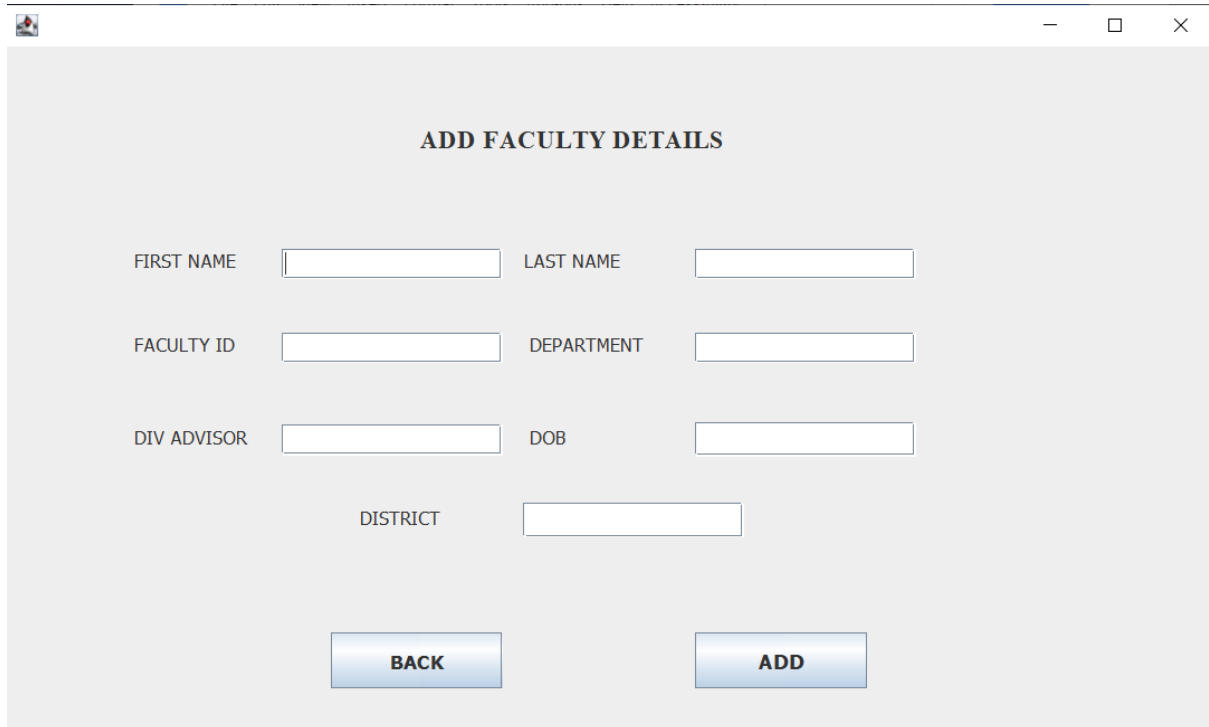

Add staff

A screenshot of a web application window titled "Add staff". The window has a standard OS-style title bar with a minimize button, a maximize button, and a close button. The main content area has a light gray background and is titled "ADD STUDENT DETAILS" in bold, uppercase letters. Below the title, there are seven text input fields arranged in a grid-like fashion: "FIRST NAME" and "LAST NAME" are on the first row; "STUDENT ID" and "DEPARTMENT" are on the second row; "DISTRICT" and "DIVISION" are on the third row; "SEM" and "DOB" are on the fourth row; and "STREET" is on the fifth row. At the bottom of the form, there are two blue buttons with white text: "BACK" on the left and "ADD" on the right.

HOD can enter the details of students and the details will be stored in the database.

Faculty and functions

A screenshot of a software window titled "WELCOME FACULTY". The window has a standard title bar with a small icon on the left and minimize, maximize, and close buttons on the right. The main content area is light gray and contains four blue buttons with white text, arranged vertically in the center. The buttons are labeled "REQUEST SERVICE", "SEND REQUEST FOR APPROVAL", "ADD STUDENT DETAILS", and "BACK".

These functionalities of Faculties are to add students , request service and request for approval .

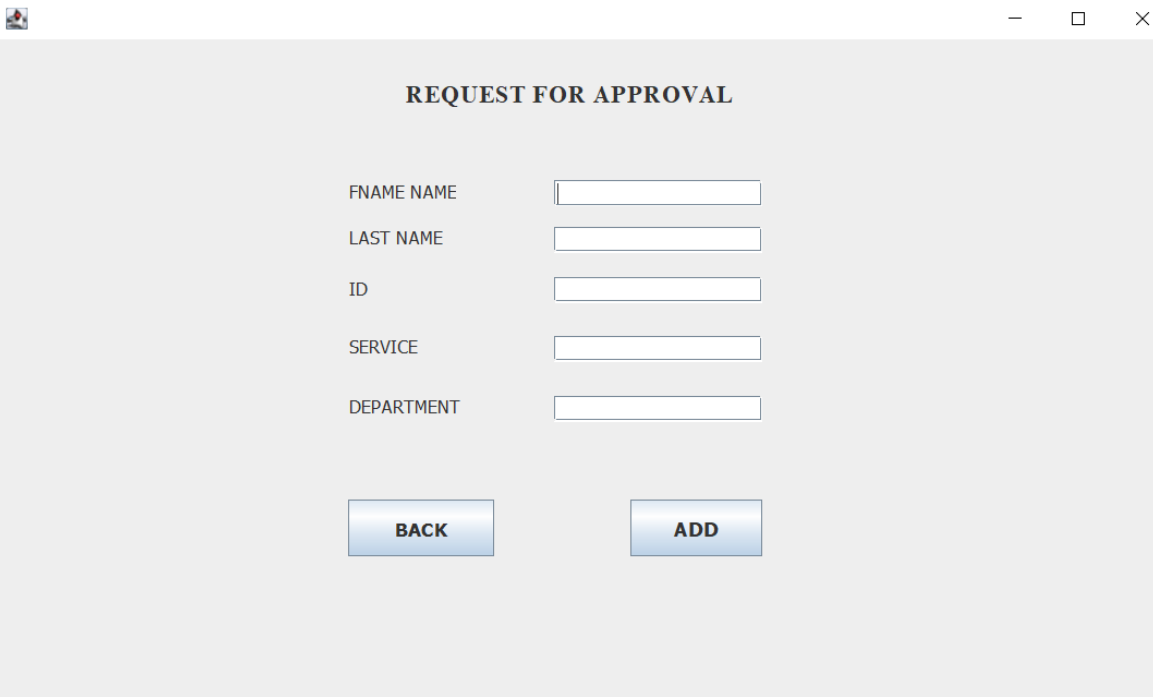

Request Service

A screenshot of a software window titled "REQUEST SERVICE". The window has a standard title bar with a small icon on the left and minimize, maximize, and close buttons on the right. The main content area is light gray and contains a form with six input fields, each with a label to its left: "FIRST NAME", "LAST NAME", "ID", "SERVICE", "DEPARTMENT", and "STATUS". Below the input fields are two blue buttons with white text: "BACK" and "ADD".

Faculty can request for service and the details will be stored in the database.

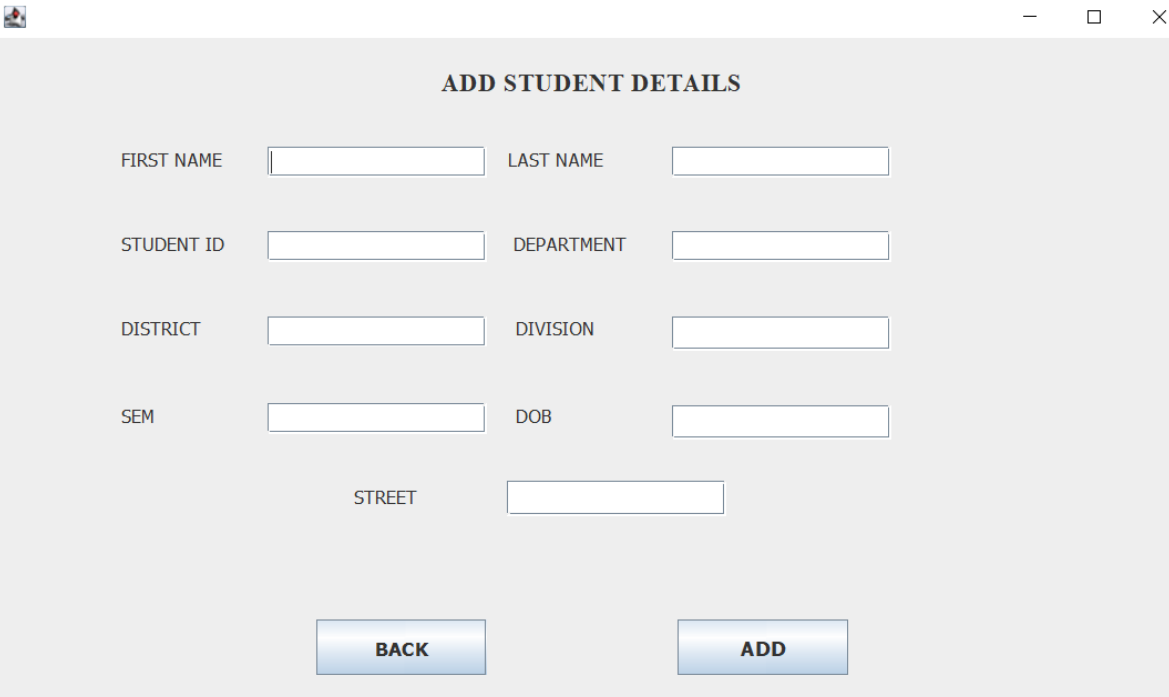

Request for approval

A screenshot of a web application window titled "Request for approval". The window has a standard OS-style title bar with a minimize button, a maximize button, and a close button. The main content area has a light gray background and is titled "REQUEST FOR APPROVAL" in bold, uppercase letters. Below the title, there are five text input fields arranged vertically, each with a label to its left: "FNAME NAME", "LAST NAME", "ID", "SERVICE", and "DEPARTMENT". At the bottom of the form, there are two blue buttons with white text: "BACK" on the left and "ADD" on the right.

Faculty can request for approval from hod and the details will be stored in the database.

Add student

A screenshot of a web application window titled "Add student". The window has a standard OS-style title bar with a minimize button, a maximize button, and a close button. The main content area has a light gray background and is titled "ADD STUDENT DETAILS" in bold, uppercase letters. Below the title, there are seven text input fields arranged in a grid-like fashion: "FIRST NAME" and "LAST NAME" are on the first row; "STUDENT ID" and "DEPARTMENT" are on the second row; "DISTRICT" and "DIVISION" are on the third row; "SEM" and "DOB" are on the fourth row; and "STREET" is on the fifth row. At the bottom of the form, there are two blue buttons with white text: "BACK" on the left and "ADD" on the right.

Faculty can enter the details of students and the details will be stored in the database.
